

# Introduction to RTOS part 1

## Notes week 2

### Operating System (OS)

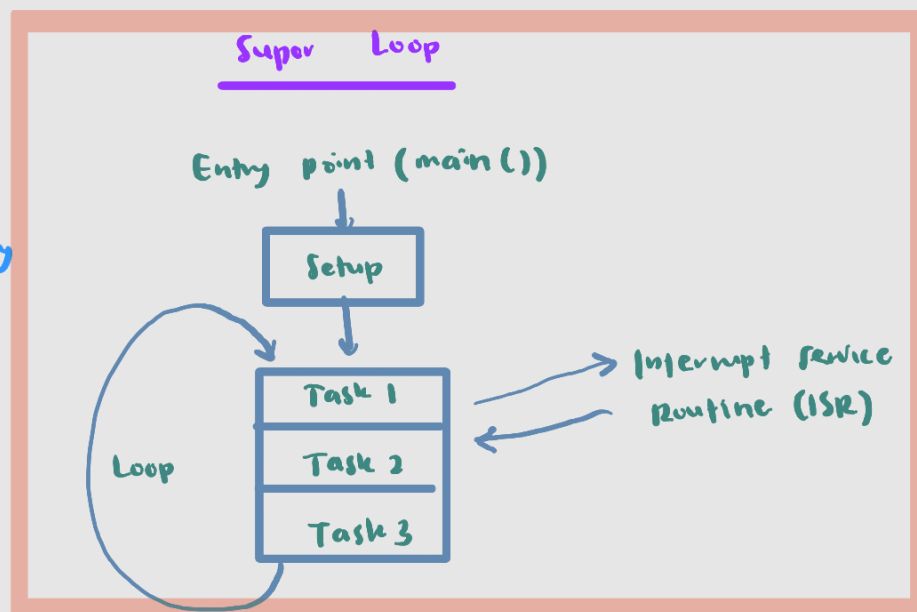

- software that runs on computer/microcontroller that accomplishes a no. of important functions

### Real-Time OS (RTOS)

- offer same functions as GPOS
- can meet timing deadlines on tasks
- provide high level device drivers
  - wifi
  - Bluetooth stack
  - LCD drivers
- run multiple tasks concurrently

- cannot execute tasks concurrently

## RTOS

Task - set of program instructions loaded in memory

Thread - unit of CPU utilization with own program counter & stack

Process - instance of a computer program

- FreeRTOS : Task = Thread

## Why RTOS?

- ↳ need to run several things concurrently
- ↳ requires large RAM & processing power
- ↳ team working on larger project

## ESP32 Development Board
